RESTRICTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1 and 2**, drawn to a process for bending elongate material, classified in class 72, subclass 306.
- II. **Claims 3-7**, drawn to a computer controlled apparatus for bending elongate material, classified in class 72, subclass 14.8.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method can be practiced without recourse to the claimed apparatus. For example, the pair of torque couples could be evening rotated through a belt connection while displacing the torque couples linearly through a piston/cylinder connection.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
